PROFILE

Software Engineer with a strong foundation in data-driven problem-solving and intelligent systems. Demonstrates the ability to design and deliver practical, real-world solutions by combining analytical rigor with adaptability to rapidly evolving technologies. Committed to leveraging data and modern tools to build impactful, scalable systems that drive meaningful outcomes.

EDUCATION

Bachelor of Science in Software Engineering
COMSATS University Islamabad (Lahore Campus)
2023 – 2027 | Lahore

FSC Pre-Engineering

Punjab Group of Colleges
2021 – 2023 | Gujranwala

Scholarship: Awarded 100% Merit-Based Scholarship for the entire Intermediate education based on outstanding Matriculation performance

Matriculation

The Educators Model Town Campus
2020 – 2021 | Gujranwala

SKILLS

Technical Skills

Machine Learning, Deep Learning,
DataScience, MySQL, PostgreSQL, Python,
Java, Flutter, Firebase, Git

LANGUAGES

English, Urdu

PROJECTS

End-to-End ML Pipeline for Student Performance Analytics

- Developed an end-to-end machine learning pipeline to predict student performance using regression models and advanced data preprocessing techniques.
- Built and deployed RESTful APIs with FastAPI for real-time predictions.
- Deployed the system on Azure and AWS, ensuring scalability and reliability.
- Followed modular design with logging and exception handling.

Medical Insurance Cost Prediction

- Created a regression model to estimate insurance costs using health and demographic data.
- Applied EDA, feature engineering, and multiple algorithms, and evaluated performance using RMSE and R^2 score.

Customer Churn Prediction

- Built a classification model to predict customer churn using Python and Scikit-learn.
- Performed data preprocessing, feature engineering, and model evaluation, and identified key factors influencing customer retention.

Handyman Service App

- Engineered a complete cross-platform mobile application using Flutter and Firebase for booking handyman services.
- Implemented user authentication, real-time database operations, and service booking workflows.
- Designed an intuitive UI and integrated backend services, including Firestore and Firebase Authentication.
- The application is actively used in a real-world environment, demonstrating end-to-end development and deployment skills.

Web Blog API

- Built a blogging API using FastAPI with CRUD operations and authentication.
- Followed clean architecture principles for scalable backend development.

Sawari – Bus Management System

- Designed a bus management backend using FastAPI and PostgreSQL as database alongwith JWT auth and enforced constraints like seat limits and route validation.
